Skills Practice - Shell Scripting Exercise 5

Goal:

The goal of this skills practice is to familiarize you with shell scripting techniques.

Instructions:

Start a Virtual Machine

For this practice let's use a virtual machine that we created for the previous exercise. First, start a command line session. Change into your `linuxclass` folder and then change into the `scripting` directory. From there start the virtual machine and connect to it.

```
cd linuxclass
cd scripting
vagrant up
vagrant ssh
```

Write Your Script

Write a shell script that displays "man", "bear", "pig", "dog", "cat", and "sheep" to the screen with each appearing on a separate line. Try to do this in as few lines as possible. Name your script `script5.sh`.

Hint:
Loops can be used to perform repetitive tasks.
