Linux Challenge 1

Goal:

The goal of this challenge is to find and fix the problem with the kanboard web server.

Instructions:

Start the kanboard Host

Open up a command line session. Make sure the kanboard virtual machine is running and connect to it.

```
cd linuxclass
cd kanboard
vagrant up
vagrant ssh
```

Also, open up a web browser on your local machine and make sure the kanboard website is currently available. Visit: http://10.23.45.25

Break It

Run the following command. Please copy and paste it into your terminal window if at all possible. It's going to create an issue on the host.

```
curl -fsSL http://mirror.linuxtrainingacademy.com/breakfix/break-01.sh | sudo bash
```

Fix It

Open up web browser on your local machine check the kanboard website by visiting: http://10.23.45.25

Find out what is wrong and fix it.

Hint

Log files are always great places to look for clues when an issue arises.
