Skills Practice - Shell Scripting Exercise 2

Goal:

The goal of this skills practice is to familiarize you with shell scripting techniques.

Instructions:

Start a Virtual Machine

For this practice let's use a virtual machine that we created for the previous exercise. First, start a command line session. Change into your `linuxclass` folder and then change into the `scripting` directory. From there start the virtual machine and connect to it.

```
cd linuxclass
cd scripting
vagrant up
vagrant ssh
```

Write Your Script

Modify the shell script from exercise 1 to include a variable. The variable will hold the contents of the message "Shell Scripting is Fun!". Name your script `script2.sh`.
