Skills Practice - Shell Scripting Exercise 1

Goal:

The goal of this skills practice is to familiarize you with shell scripting techniques.

Instructions:

Create a Virtual Machine

First, start a command line session on your local machine. Next, move into the working folder you created for this course. From there, initialize a Vagrant project named "scripting", start the virtual machine, and connect to it.

```
cd linuxclass
mkdir scripting
cd scripting
vagrant init jasonc/centos8
vagrant up
vagrant ssh
```

Write Your Script

Write a shell script named `script1.sh` that prints "Shell Scripting is Fun!" to the screen.

Hint 1:
Remember to make the shell script executable with the `chmod` command.

Hint 2:
Remember to start your script with a shebang!
